To ensure both sides have a clear understanding of the tasks, the following activities were undertaken:

A	Pre-Installation Check
1	Verify site readiness, including the designated installation location and availability of required power and network connectivity.
2	Verify biometric scanning device compatibility and required installation requirements.
	Confirm the designated location and installation requirements with the client's representative.
B	Biometric Device & Software Installation
1	Configure the biometric scanning device and associated software
2	Configure the required system settings and establish device connectivity
3	Ensure proper communication between the biometric device and the installed software/system.
C	Testing & Commissioning
1	Test the biometric scanning device for proper functionality
2	Verify biometric scanning and data capture functionality
3	Test software operation and communication with the biometric device
